CAMELLIAS

Magnoliae-flora

To those who prefer single or semi-double flowers, a bloom like this seems near perfection. Its exquisite shell-pink color is lovely to behold, and the foliage makes a handsome plant. This variety is extra hardy and can be depended on to bloom in the middle of winter.

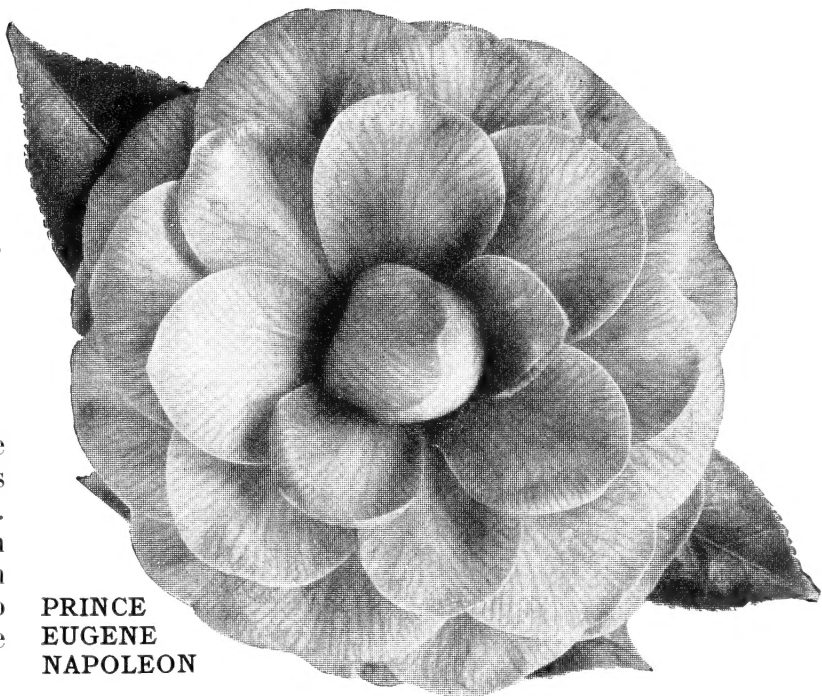

Debutante

This is one of the old reliable varieties that have been known and loved by generations of flower growers. The pleasing form and warm pink color are delightful either on the bush or when cut. The plant is a tall, strong grower and resists cold well. Plant it in the shade.

To Our Customers

For the past twelve years this Nursery was operated by Mr. T. R. Ramsey, but when his health failed last year it was taken over by us. Our aim is to continue giving the same fine service.

PRINCE
EUGENE
NAPOLEON

All of the Camellias listed in the "Rare" and "Class A" groups are grafted on sturdy 7- to 12-year-old understock, which will grow a top plant 2 to 4 feet tall in one season and will often bloom the first year. This vigorous growth will continue until the top is in balance with the root system, usually 4 to 6 years. Thus by grafting, you can have a fine large Camellia in 4 to 6 years, whereas on its own root system it would take 12 to 15 years. Furthermore, grafted plants, due to their vigorous growth, are more resistant to disease. We are introducing forty varieties this year not carried in stock here in the past.

We also carry a good variety of Kurume, Indica, and Hardy Japanese Azaleas. All Azaleas are profuse bloomers, and in the spring each plant is a solid mass of color. The season of blooming is very long, beginning in early winter and lasting until June.

General Nursery Stock of many varieties is available at all times. We also maintain a complete landscaping service.

We guarantee all of our plants to be well rooted and healthy when they leave the Nursery. We have no control over growing conditions after the plants leave the Nursery, and therefore cannot guarantee them to live. This depends on the knowledge and skill of the purchaser.

Prices in this catalogue cancel all previous quotations and are subject to change without notice. Values are governed by the character of the individual specimen. Orders are accepted and filled in rotation, so if you desire the choicest plants place your orders early.

If no instructions are received with orders to be shipped, we will pack and ship them in the manner we consider best. All plants are packed and delivered F.O.B. the carrier.

DONKELAARI

RARE CAMELLIAS

AREJISHI (Aloha)

Deep rose-pink when the flowers begin to open in August, turning deep red with colder weather. The new foliage is deep red, turning dark glossy green with deep serrations. A spreading, vigorous plant of open habit and a profuse bloomer even when quite young. Will stand full sun. Blooms August to December.

BEAUTY OF HOLLAND (Jenny Lind, Hermes Sport No. 2)

Dark pink and white variegated. Outstandingly beautiful. The plant is very hardy, a fairly vigorous grower, tall and angular in shape until it attains some age, when it becomes more compact. Foliage is long pointed, smooth, and glossy. Plant in semi-shade. Blooms November to April.

DONKELAARI (Middletoni No. 15)

Deep red flowers with splashes of white. Flowers are often 5½ inches in diameter. Long, smooth, glossy, sharply pointed foliage. Dwarf, slender, willowy growth. Very hardy. Plant in sun or shade. Blooms December through March.

DUCHESS OF SUTHERLAND

Immense white flowers with an occasional pink stripe. Sometimes a pink sport develops. The stamens form a compact yellow ball in the center of the flower. The foliage is large, long, glossy, medium green, on tall, compact plants. Plant in shade. Blooms December to March.

DUNCAN BELL (Mrs. Mena Ladnier)

A large peony-form flower. Beautiful red flowers 5 to 6 inches in diameter. Very fast growth.

ELEANOR HAGOOD

Full double, pink flowers 3 to 3½ inches across. Long pointed, dull green foliage on upright, vigorous plants. Blooms in late March.

DUCHESS OF SUTHERLAND

ELISABETH BOARDMAN

Pure white, semi-double flowers with irregular petals. Large, rounded, light green foliage. An upright grower, vigorous and hardy. Blooms December through March.

FIREGOLD (Dr. Sheppard, Te Deum, Pasha of Persia)

Bright dark red flowers varying from single to fully double, often on the same plant. Young plants usually bear fully double blooms. Slender, open and willowy in growth. Will stand full sun. Blooms late February through April.

GLEN NO. 40

Large, double, vivid red flowers. Foliage is deep glossy green. Slow and stocky growth. Plant in sun or shade. Blooms begin to open in January.

HAKU-RAKUTEN (Refuge)

Extraordinary white blooms, loosely formed, with a few stamens intermingled with the petals. Light green, glossy foliage. A tall, vigorous grower.

IMURA

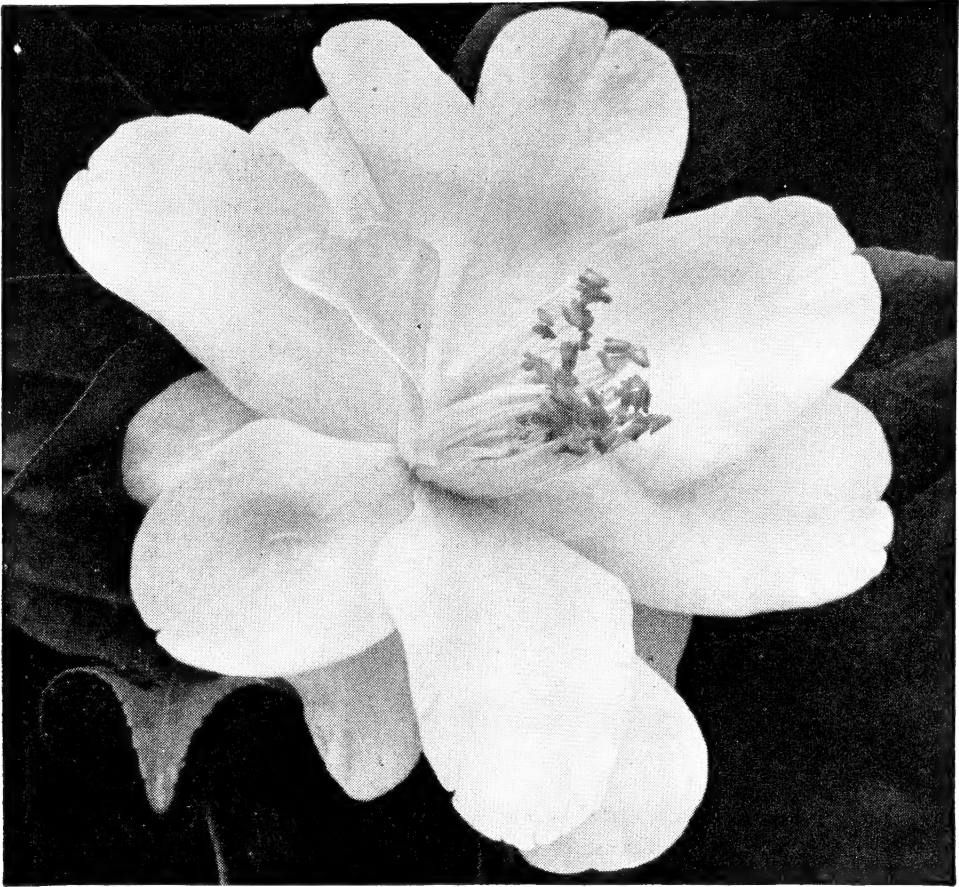

Large, semi-double, white flowers, resembling a waterlily. Foliage is medium green, long, narrow, and slightly drooping. A rapid, slender grower, and very hardy. Plant in shade. Blooms November through February.

LADY JANE GRAY (Eugene Lizze)

Variegated pink and white, loose, peony-shaped flowers of good size. A slow, dwarf and compact grower. Blooms freely and opens well. Plant in shade. Blooms January through March.

LADY MARY CROMARTIE (Magnolia No. 25)

Large, semi-double to loose peony-formed, deep rosy red, with prominent stamens. Center petals are ruffled. Glossy, deep green, rounded and serrated foliage. Can be planted in full sun. Blooms from December to March.

IMURA

RARE CAMELLIAS, continued

LOTUS (Sode Gutchie)

The largest Camellia. White, semi-double with a large cluster of stamens in the center. Long, dull green, heavily ribbed foliage. A midseason to late bloomer.

MAGNOLIAEFLORA

Delicate, single, shell-pink flowers. Foliage is pale green, very glossy, sharply pointed, and serrated on the edges. Compact and moderately vigorous. Very hardy. Plant in shade. Blooms January to March.

MARCHIONESS OF EXETER

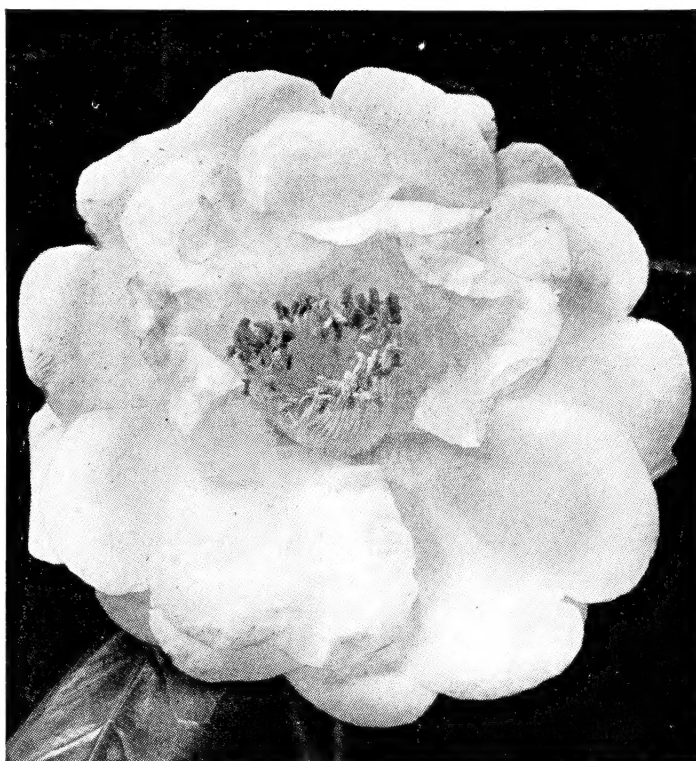

Large, peony-formed, deep pink blooms. The flowers are long lasting and 4 to 5 inches in diameter. Leaves are large, light green and glossy. Plant is a very slow grower and wide-spreading. Plant in semi-shade. Blooms December through March.

MARION MITCHELL

Beautiful, large, semi-double, scarlet-red blooms. Very long, narrow, dark green, smooth foliage. The plant is slender, hardy and vigorous. Blooms December through March.

MRS. WILLIAM THOMPSON

A very large, semi-double, white flower displaying prominent stamens. Large, rounded, serrated foliage. Midseason bloomer.

LOTUS

REV. JOHN BENNETT

Huge, semi-double, deep rose-pink blooms with prominent stamens. Long, sharply pointed, glossy foliage. Slowly spreading growth. Very hardy. Blooms from January through March.

ROSE DAWN

Large, rose-pink, double bloom. Similar in form and shape to Alba Plena. A vigorous grower. Free in bloom even when quite young.

ROSEA SUPERBA (Mathotiana Rosea)

Very large flowers of rosebud form; deep pink, with some stamens showing when fully developed. Large, glossy foliage and tall, sturdy grower. Plant in semi-shade. Blooms December to April.

VICTORY WHITE

Semi-double, peony type, pure white. Numerous small petalets intermixed with yellow stamens at the center. A very heavy midseason bloomer.

WHITE GIANT

Very large, semi-double, pure white flowers, often 6 inches in diameter. Very large, extra dark shiny green leaves, occasionally variegated with white. A very vigorous, upright grower and midseason bloomer.

Prices of Rare Camellias

12 to 18 inches.....	\$10 00
18 to 24 inches.....	15 00

30 to 40 inches.....	\$25.00 to 30 00

C. M. HOVEY

CLASS A CAMELLIAS

ALBA PLENA

Long-lasting, pure white, fully double flowers. Blooms profusely when plant reaches 4 feet. Glossy green leaves, some of which are marbled with pale yellow. Plant in semi-shade. Blooms October through January.

AUGUSTA WILSON

Flowers are full peony-formed, deep pink, $3\frac{1}{2}$ to 4 inches across. The plant is tall, open and vigorous in growth. Blooms November through April.

CHANDLERI ELEGANS

Very large, pink and white variegated, loose peony-form flowers with prominent stamens. Slow and wide-spreading growth. Plant in sun or shade. Blooms in late January.

CHRISTINE LEE

Lovely semi-double, pink flowers 4 to 6 inches across, with prominent stamens. Spreading, bushy growth. Midseason to late bloomer.

C. M. HOVEY (Paulina)

Rose-formed, red to deep pink flowers marbled and speckled with white. A vigorous, symmetrical grower. Does well in sun or shade. Blooms December through March.

COL. FIREY (W. S. Hastie, Mississippi Hastie)

Perfect formal, dark red, fully double blooms. Slender, rather spindly plants unless grown in full sun. Blooms February to April.

DAIKAGURA

Large, loose peony-form, rose-red blooms with prominent yellow stamens. A slow grower with open, willowy habit. Will stand some sun. Blooms October through December.

DEBUTANTE (Sara C. Hastie)

Full peony-form, light pink flowers. A vigorous, tall, compact grower; quite hardy. Plant in shade. Blooms October through January.

EMPRESS (Grandiflora Rosea, Lady Clare)

The largest semi-double, bright deep pink. A vigorous, compact, spreading grower. Plant in sun or shade. Blooms November through February.

EMPRESS VARIEGATED

Similar in growth to Empress, except flowers are spotted white. Plant in sun or shade.

ENCHANTRESS

Large, semi-double, pink flowers with conspicuous stamens. Small, glossy foliage. Tall, upright grower. Late flowering.

GIGANTEA (Magnolia King)

Very variable in form from single to peony form, and in color from solid red to predominant white. Very large, dark green foliage. Plant in sun or shade. Blooms January through March.

GOV. MOUTON (Aunt Jettie)

Peony-form red blooms. Vigorous, open, willowy grower. Will stand much sun, and is quite hardy. Blooms January to March.

HERME (Jenny Lind)

Large, loose peony-formed, slightly fragrant, extremely variable rose and white blooms. A very hardy, fairly vigorous, tall and angular grower. Will stand full sun. Blooms from November through April.

HERME SPORT NO. 1

Similar in all ways to Herme but blooms are all pink.

HERME SPORT NO. 3

Predominantly white blooms with red stripes. Plant in semi-shade.

HERME SPORT NO. 4

Predominantly pink petals with white edges; otherwise similar to Herme.

JARVIS RED

Semi-double red with yellow stamens. Very vigorous, spreading growth. [Plant in shade or sun. Blooms December through March.

KELLINGTONIA

Orange-red flowers with stripes or blotches of white; open peony type. Always blooms heavily and has extra good foliage.

KUMASAKA

Large, deep pink flowers of peony form. The unusually glossy foliage is very distinctive. A compact, upright, moderately vigorous grower. Very hardy. Plant in semi-shade. Blooms late January through March.

LADY VAN SITTART

Bold red, semi-double blooms with pink to red filaments. Young plants often bear profusely. Plant in full sun. Quite hardy. Blooms late January through March.

LA REINE VARIEGATED

Large, showy, pink and white variegated flowers, semi-double to loose peony form. Vigorous growing plant with large, rounded, deep glossy green foliage. Plant in sun or shade. Blooms December through March.

MATHOTIANA RUBRA

(Julia Drayton, Purple Emperor, Purple Dawn, W. S. Hastie)

Large, rose-shaped, deep red blooms. Young plants often bloom profusely. Vigorous, compact, symmetrical growing. Large, glossy, dark green, smooth foliage. Quite hardy. Plant in semi-shade. Blooms November to March.

CLASS A CAMELLIAS, continued

MONARCH (Honor of America)

Deep pink flowers of enormous size; many clusters of stamens and petals inside large outer petals. Compact grower. Plant in sun or shade. Blooms February to April.

NOBILISSIMA

Pure white, peony-form bloom with yellow stamens. Tall, upright grower with light green foliage. A midseason bloomer.

OTOME

Double, formal type, delicate pink flowers about 3½ inches across. Petals are somewhat notched or scalloped on the edges. A slow spreading grower. Blooms February to April.

PAEONIFLORA VARIEGATED

Shaggy peony-type, white blooms speckled with pink—very large and beautiful. A slow, compact grower. Rounded, glossy, dark green foliage. Blooms November through March.

PINK PERFECTION

Small, well-formed, double flowers of shell-pink, that open perfectly. A vigorous, symmetrical, compact grower. Blooms late October to April.

PRINCE EUGENE NAPOLEON (Pope Pius IX, Fielder's Red)

Flowers are double, deep blood-red, of medium size. Midseason bloomer. Large, glossy dark green foliage and open growth.

PRINCESS BACHANACHI

Fully double, dark red blooms, marbled with white. Large, rounded, glossy, dark green foliage, a few leaves marbled with yellow. Blooms February through April.

PROF. C. S. SARGENT

Blooms are heavy, peony-formed, large, dark pink turning to dark red with cooler weather. Vigorous, compact and very hardy. Plant in full sun. Blooms October through April.

SWEETIANA VERA

Peony-type blooms of white and pale pink, with prominent yellow stamens. Plants are very vigorous and somewhat open. Blooms October through December.

VITTORIO EMANUELE (Blood of China)

Large, very dark red blooms of loose peony to semi-double form. The plants are hardy, vigorous, and spreading. Blooms late February through April.

WHITE CHANDLERI

Seedling of Chandleri Elegans. One of the best of the midseason white peony-form Camellias. Hardy, slow grower.

WHITE PINE CONE (Dante)

Pure white, semi-double, incurved petals resembling a pine cone. Rapid growing, sturdy and upright. Large, heavy-textured foliage. A late bloomer.

Prices of Class A Camellias

10 to 18 inches	\$7 50
18 to 24 inches	10 00
24 to 30 inches	12 50
30 to 36 inches	15 00
3 to 5 feet	18 50
5 to 7 feet	22 00

CLASS B CAMELLIAS

ABBY WILDER

Medium to large, peony-shaped, white flowers with tiny splashes of pink. Compact, hardy and good grower.

BROWN'S RED

Very dark red, semi-double. Good, hardy grower with dark green leaves.

CARNATION

Red flower, small to medium in size. Plant has open growing habit and does not bloom until fairly large.

DUC D'ORLEANS

Three-inch, peony-type, creamy white flowers which sometimes have a dash of pink on a petal. Free midseason bloom.

ELIZABETH

Very double, pure white blooms; once in a while pure pink flowers will appear. Thick, dark green leaves.

ENRICO BETTONI (Haley's Monarch, West Coast Sarah Frost)

Very fast, open growth. Flowers large, light pink, varying in form from semi-double to peony.

GAIETY

Semi-double, white and red variegated with yellow stamens. Very dark green leaves; compact grower. Flowers are similar to Fanny Bolis.

GLOIRE DE NANTES

Large, semi-double, deep pink blooms, with yellow stamens showing. Extremely large, dark green leaves. Blooms in February and March.

IMPERATOR

The blooms are peony-form, deep red with golden stamens among the petaloids. Dull green, twisted foliage and open growth.

JUANITA

Blooms are pink and white variegated, peony-form; sometimes a solid pink appears. Free bloomer; loose growing habit.

LADY SAUMEREZ

Flowers are dark rose-pink, fully double. Compact grower with dark green leaves. Midseason bloomer.

LAURINE

Dark pink, sometimes showing white splashes; full double. Midseason bloomer.

LILLY

Attractive, medium-sized, double white flower. Rapid grower, symmetrical and compact.

LONG VIEW

A delicate double pink flower, sometimes almost white. Open growth. Midseason bloomer.

CLASS B CAMELLIAS, continued

MADAME STREKALOFF

Peony-form, rose-pink flowers, streaked with deep rose-red. Rapid, bushy growth; light green foliage.

MARGUERITE

Peony-form, medium-sized, pink flowers, similar in form to Prof. C. S. Sargent. Midseason bloomer.

MATHOTIANA ALBA

Full double, large, pure white flowers. Light green foliage; tall grower. Must be planted in dense shade for best results. Late bloomer.

MEIG'S VARIEGATED

Medium size, light rose-pink sometimes spotted white, full rose double. Fast grower. Glossy pointed foliage.

MRS. HADDON

Flowers are light shell-pink, double. A vigorous grower. Blooms in midseason.

MRS. LUERMAN

Full double, red marbled with white. Dark green foliage; slow grower. Late flowering.

OPELOUSUS PEONY

Peony-form, delicate pink center fading to white on outer edge of petals. Midseason bloomer.

RENA CAMPBELL

Peony-form, large blooms varying on the same plant from solid pink to white with pink streaks. Prominent stamens.

SARAH FROST

An old and widely planted variety. Full double, rose-red. Grows well in sun or shade. Blooms January through April.

SEMI-DOUBLE BLUSH (Celtic Rosea, Pearl of China)

Blooms are 3½ inches across, semi-double, flesh-pink with golden stamens showing among the petals. A slow grower with narrow, light green foliage.

STILES PERFECTION

Pink and white, peony-form flowers. An upright grower and midseason bloomer.

T. K. VARIEGATED

Semi-double, medium-sized flowers with stamens showing, producing every color combination from white with red stripes, pink with purple stripes, to solid red flowers.

TRICOLOR

Semi-double flowers of almost pure white to red and intermediate colors on the same bush.

Prices of Class B Camellias

10 to 18 inches.	\$2 50
18 to 24 inches.	5 00
24 to 30 inches.	7 50

AZALEAS

Indica Type

BRILLIANT

Midseason. Deep pink. Free bloomer. Bushy plants with small leaves.

DIXIE

Midseason. Salmon flowers with lavender splotches in throat. Strong-growing, bushy, hardy type.

ELEGANS

Light pink. Fast grower with rather open habit. Good foliage. Medium-sized blooms, freely produced.

FIELDER'S WHITE

Early. Large, pure white flowers. Strong, hardy, upright grower. Free bloomer.

FORMOSA

Midseason. Lavender. Free flowering. Large green foliage and tall bushy growth. One of the best.

GEORGE FRANC

Large, early salmon with deep rose throat. Profuse bloomer. Low, flat growth. Quite hardy.

GLORY OF SUNNINGHILL

Late. A hardy, bushy, compact grower with good foliage. Flowers of medium size, orange to red in color.

OMURASAKI

Midseason. Hardy, strong growing, with flowers of rose-lavender.

PHOENICIA

Early. Somewhat like Formosa, but has narrow petals and slightly slower growth.

PRESIDENT CLAY (Flame)

Early. Orange, medium-sized flowers. Plants are tall, open growers.

PRIDE OF DORKING

Large, late flowering. Deep red. Profuse bloomer.

PRIDE OF MOBILE

Watermelon-pink. Fast grower with large leaves. Profuse midseason bloomer.

Prices of Indica Azaleas

12 to 18 inches	\$1 00
18 to 24 inches	1 50
24 to 30 inches	2 00
30 to 36 inches	3 00
36 to 40 inches	4 00
40 to 48 inches	5 00

AZALEAS, continued

Kurume Type (Dwarf)

BRIDESMAID

Midseason. Single, deep salmon-pink flowers in large clusters on tall plants.

CHERRY BLOSSOM

Late. Cherry-blossom color. Tall, open growth. Round, dull green foliage.

CHRISTMAS CHEER

Midseason. Brilliant red blooms of hose-in-hose type. Plants are slow growing and wide spreading.

CORAL BELLS

Midseason. Small, deep pink, hose-in-hose. Profuse bloomer.

HEXE

Midseason to late. Large, deep red blooms, hose-in-hose. Bushy, dwarf plants.

HINODEGIRI

Midseason. Single, deep red flowers. Heavy bloomer; low, compact, bushy plants.

PINK PEARL

Early. Pale pink, fringed blossoms of hose-in-hose type. Tall, rapid-growing plants with light green, glossy foliage.

SNOW

Midseason. Pure white flowers. Deep green, glossy foliage.

SWEETBRIAR

Midseason. Single pink flowers of medium size. Small leaves; fast-growing, upright plants. Very hardy.

Prices of Kurume Azaleas

6 to 8 inches	\$0 75
8 to 12 inches	1 00
12 to 15 inches	1 50
15 to 18 inches	2 00

Hardy Japanese Type

FLAME

Bright orange flowers, very early. Grows extra tall. Free blooming.

FUJIMOYO

Delicate lavender, single flowers. Compact grower; good foliage.

KAEMPFER

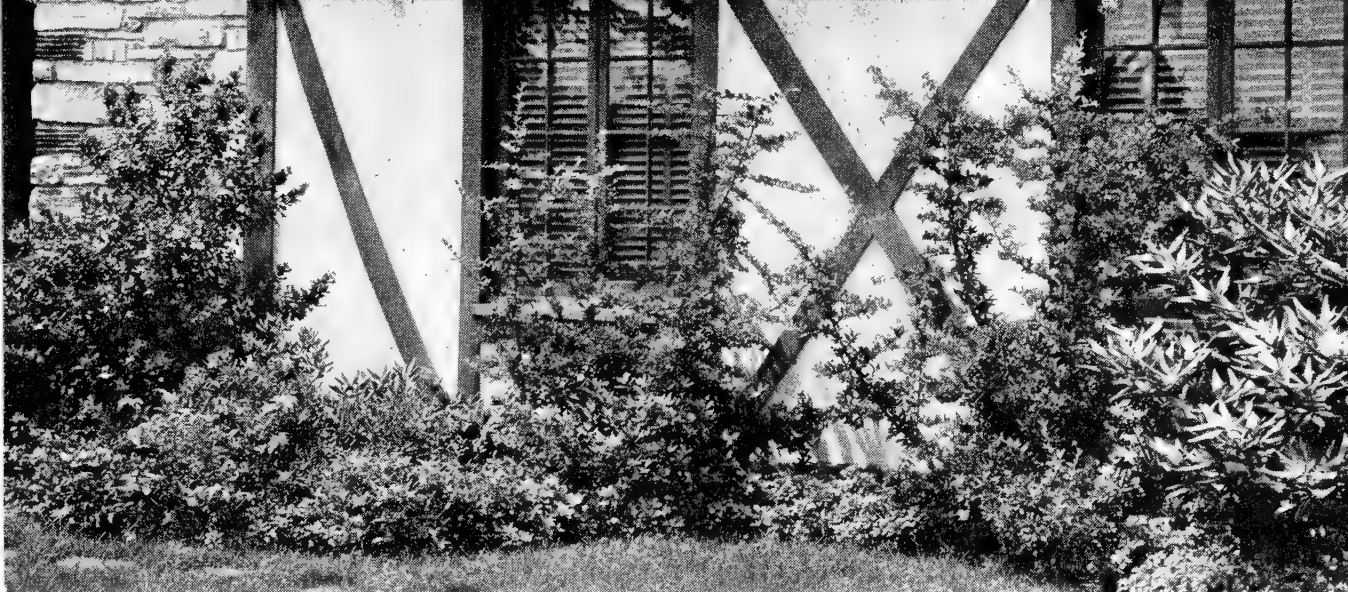

Big, single red flowers are borne profusely rather late in season. This Azalea will lose its leaves farther north, where it will stand the winters of New England.

MACRANTHA

Compact grower. Single, medium-sized, pink flowers. Very hardy. Blooms very late—in May in this section.

Prices of Hardy Japanese Azaleas

8 to 12 inches	\$0 50
12 to 18 inches	1 00
18 to 24 inches	1 50
24 to 36 inches	3 00

Ornamental Trees and Shrubs

ABELIA GRANDIFLORA

Glossy dark green foliage with a profusion of white, funnel-shaped flowers tinted with pink and borne in clusters from May to autumn.

18 to 24 inches	\$0 75
2 to 3 feet	1 00
3 to 5 feet	1 25

BERBERIS THUNBERGI ATROPURPUREA (Red-leaved Japanese Barberry)

Leaves are dark bronze-red, contrasting excellently with other green shrubs.

12 to 18 inches	\$1 50
18 to 24 inches	2 50
24 to 36 inches	3 00

BOTTLE-BRUSH (*Callistemon rigidus*)

In April this plant produces long, cylindrical brush-like flower-spikes. Very showy.

3 to 4 feet	\$3 00
4 to 6 feet	5 00

BUXUS SEMPERVIRENS SUFFRUTICOSA (English Boxwood)

A compact, slow-growing evergreen. Leaves are small and narrow.

6 to 8 inches	\$0 50
8 to 12 inches	75
12 to 16 inches	1 25
16 to 20 inches	1 75
20 to 24 inches	2 00

CLEYERA JAPONICA

A fine, compact, medium-sized evergreen. Leaves are thick and glossy and turn red before falling. Creamy white flowers in late spring.

18 to 24 inches	\$1 50
2 to 3 feet	2 50
3 to 4 feet	3 00

COTONEASTER

White flowers followed by red berries.

2 to 3 feet	\$1 50
3 to 5 feet	2 50

ELAEAGNUS PUNGENS

Does well in sun or shade.

2 to 2½ feet	\$2 00
2½ to 3 feet	2 50
3 to 4 feet	3 50

ORNAMENTAL TREES AND SHRUBS, continued

FEIJOA SELLOWIANA (Pineapple Guava)

A compact-growing shrub with light green leaves of silvery color underneath. Beautiful purple flowers in late spring. Withstands weather down to zero.

12 to 18 inches	\$1 00
18 to 24 inches	1 50
2 to 3 feet	2 50

GARDENIA GRANDIFLORA (Cape Jasmine)

Beautiful white flowers beginning in May.

12 to 18 inches	\$1 00
18 to 24 inches	1 50
2 to 3 feet	2 00
3 to 5 feet	3 50

ILEX BURFORDI (Holly)

One spine to the leaf.

I. CORNUTA

Several spines to the leaf. Hardy to New Jersey.

Either:

12 to 15 inches	\$1 00
15 to 18 inches	1 25
18 to 24 inches	2 00
2 to 3 feet	3 00

JASMINUM FLORIDUM

Hardy south of Washington. Arching branches covered with dark green leaves and yellow flowers a good part of the summer.

2-year plants	\$0 35
3-year plants	50

LIGUSTRUM LUCIDUM

Commonly known as Wax Privet. Leaves are thick and dark green. White flowers with a pleasant aroma in the summer. Very good for foundation and background planting.

18 to 24 inches	\$1 00
2 to 3 feet	1 50
3 to 4 feet	2 00
4 to 5 feet	2 50
5 to 6 feet	3 00

NANDINA DOMESTICA

Plants have white flowers in the early summer and red berries in the winter. Feathery leaves on several canes.

12 to 18 inches	\$0 75
18 to 24 inches	1 00
2 to 2½ feet	1 50
2½ to 3 feet	2 00
4 to 5 feet	5 00

OSMANTHUS FORTUNEI (Tea Olive)

Beautiful holly-like leaves and fragrant white flowers in the fall. A good broad-leaved evergreen, hardy south of Washington, D. C.

18 to 24 inches	\$2 00
24 to 30 inches	2 50
2½ to 3 feet	3 00

PHOTINIA GLABRA AND SERRULATA

The new growth on this plant is vivid red, and is very attractive among other evergreens during the growing season. Should be clipped often to induce more growth.

2 to 3 feet	\$1 50
3 to 4 feet	2 00
4 to 5 feet	3 50

PITTOSPORUM TOBIRA

The well-known broad-leaved evergreen. A dense and rapid grower.

12 to 18 inches	\$1 00
18 to 24 inches	1 50
2 to 3 feet	2 00
3 to 4 feet	3 00

PYRACANTHA (Firethorn)

A winter-berried plant with large clusters of large red berries after August.

15 to 18 inches	\$1 00
18 to 24 inches	1 50
2 to 3 feet	2 00
3 to 6 feet	3 50

SPIRAEA VAN HOUTTEI AND THUNBERGI

2-year plants	\$0 75
3-year plants	1 25
4-year plants	2 50

TUNG-OIL-NUT TREES (*Aleurites Fordi*)

A sure money-maker.

1-year-plants	\$0 25
2-year-plants	50

Substantial reductions on large quantities.

VIBURNUM ODORATISSIMUM

Shrub with rounded light green leaves. A fast grower resembling English Laurel. Clusters of white flowers.

V. SUSPENSUM

A more dwarf type.

V. TINUS

A compact shrub with small, shiny leaves and clusters of pinkish white flowers at terminals of shoots during the winter months.

Any of above:

12 to 24 inches	\$1 00
24 to 30 inches	1 50
30 to 36 inches	2 00

FLOWERING QUINCE

1-year plants	\$0 50
2-year plants	1 00
3-year plants	2 50

FORSYTHIA

1-year plants	\$0 50
2-year plants	1 00

CONIFERS

CEDRUS DEODARA

Tall, pyramidal, beautiful blue-green. Similar to Blue Spruce.

4 to 6 feet	\$4 00
6 to 7 feet	5 00

JUNIPERUS CHINENSIS PFITZERIANA

12 to 15 inches	\$0 75
15 to 18 inches	1 25
18 to 24 inches	2 00
24 to 30 inches	3 00

RETINOSPORA ERICOIDES

A fast and upright grower with feathery bluish foliage. Can be easily trimmed.

30 to 36 inches	\$2 00
4 to 6 feet	3 50
6 to 8 feet	5 00

PALMS

COCOS AUSTRALIS

18 to 24 inches	\$1 00
2 to 3 feet	1 50
3 to 4 feet	2 00
4 to 5 feet	3 50

Grass-like evergreen bearing spikes of blue flowers. Excellent for edging and border planting.

3- to 5-crown plants	\$0 05
--------------------------------	--------

ORNAMENTAL GRASS

OPHIOPOGON

Very narrow, dark green leaves. Low growing. Makes a good ground-cover.

3- to 5-crown plants	\$0 05
--------------------------------	--------

A Few Cultural Hints

1. Plant Camellias, and particularly Azaleas, in a neutral to fairly acid soil. Never use lime on either. The best way of acidifying the soil is to add aluminum sulphate or sulphur.
2. Do not loosen or remove the burlap on the ball of the plants when planting.
3. Mulch the surrounding ground well with peat moss, oak or other leaves, or wood bark. Do not use camphor tree leaves or pecan tree leaves.
4. Fall is the best time for moving and transplanting Camellias and Azaleas.
5. If signs of die-back appear, cut the dead branch back to where there is no brown discoloration in the woody part of the branch.
6. Spray Camellias in June with Bordeaux mixture to control die-back (Phomopsis blight).
7. In May spray Camellias with Nursery Volck, 1 part to 50 parts of water, plus 1 tablespoonful of Black-Leaf 40 to each gallon of Volck spray mixture.
8. Fertilize Camellias and Azaleas lightly in March and June.

Azaleas provide a dense mass of bloom in early spring and are among the showiest of garden shrubs. Their colors range through pink and salmon to bright red and purple, as well as yellow, orange, and white. Indica varieties are especially good in the South, where they grow 4 to 6 feet tall. Choose a partly protected location where the soil is moist and acid.
